## SUMMARY

React.js Frontend Developer with 2+ years of professional experience in designing and developing scalable, responsive, and high-performance web applications using React.js, TypeScript, and modern JavaScript (ES6+). Experienced in building reusable UI components, implementing Redux Toolkit for state management, integrating RESTful APIs, and developing secure authentication systems using JWT. Strong understanding of responsive web design, performance optimization, code splitting, lazy loading, and frontend best practices. Worked closely with cross-functional teams in Agile environments to deliver high-quality, user-centric applications. Passionate about writing clean, maintainable code and continuously learning modern frontend technologies.

## Technical Skills

|                       |                                                                                        |
|-----------------------|----------------------------------------------------------------------------------------|
| Programming Languages | : JavaScript (ES6+), TypeScript                                                        |
| Frontend Technologies | : React.js,HTML5,CSS3,Bootstrap5,Tailwind CSS,Responsive Web Design,Flexbox, CSS Grid. |
| Backend Integration   | : RESTful APIs,Axios,Fetch API,JSON.                                                   |
| Tools                 | : Postman                                                                              |
| Version Control       | : Git, Git Hub                                                                         |
| Backend Knowledge     | : Node.js,Express.js                                                                   |
| IDE                   | : VS Code, Android Studio.                                                             |

## WORK EXPERIENCE

Kushal Technologies, Hyderabad May 2024- Present

Project-1: Pudami Stores- Ecommerce Platform for Kids Toys

Role:React.js Developer

TechStack: React.js, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Stripe, Node mailer, Git, GitHub.

Description: Pudami Stores is a full-stack e-commerce application developed for selling children's toys online. The platform allows customers to explore products, manage carts and wish lists, make secure payments, and track their orders. It also includes features such as user authentication, product filtering, order management, and automated email notifications. The application was designed to be responsive, user-friendly, and scalable, providing a seamless shopping experience across different devices.

### Key Contributions:

- Developed responsive and mobile-first user interfaces using React.js, TypeScript, and Tailwind CSS, ensuring a seamless user experience across desktop, tablet, and mobile devices.
- Built reusable and modular React components, improving application scalability, maintainability, and development efficiency.
- Implemented Redux Toolkit for centralized state management, enabling predictable data flow and efficient handling of user, product, cart, and Wishlist data.

- Integrated JWT-based authentication with protected routes and session management, ensuring secure user access and authorization.
- Developed dynamic product listing, category filtering, search, and sorting functionalities to enhance product discovery and user engagement.
- Optimized application performance by minimizing unnecessary re-renders, implementing component memorization, and improving API handling efficiency for a smoother user experience.
- Integrated RESTful APIs using Axios for seamless frontend-backend communication and efficient data retrieval across multiple application modules.

---

## Project 2: Medical Staff Management

**Role:**React.js Developer

**Tech Stack:** React.js,TypeScript,Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Stripe, Git, GitHub.

**Description :** HospitalManagementSystem is a web-based application designed to streamline hospital operations by connectingpatients, doctors,and receptionists on a single platform. The system enables appointment scheduling, doc -tor availability management, patient record handling, and role-based access control. It helps improve operati-onal efficiency and provides a seamless experience for both hospital staff and patients.

**Key Contributions:**

- Developed responsive and role-based dashboards for Doctors, Receptionists, and Patients using React.js and TypeScript, delivering an intuitive and efficient user experience across multiple user roles.
- Designed and implemented appointment management workflows, including appointment booking, rescheduling,cancellation, and status tracking, improving operational efficiency and patient scheduling processes. Implemented secure authentication and authorization using JWT and protected routes, ensuring role-based access control and data security across the application.
- Utilized Redux Toolkit for centralized state management, enabling efficient handling of appointments, doctor schedules, patient records, and user-related data.
- Integrated RESTful APIs using Axios to facilitate seamless frontend-backend communication and real-time synchronization of appointment and patient information.
- Developed doctor availability and schedule management modules, allowing efficient consultation slot management and improved appointment coordination.
- Optimized application performance by building reusable components, implementing lazy loading techniques, and minimizing unnecessary re-renders to enhance overall responsiveness and user experience.

## EDUCATION

| Bachelor of Technology (B.Tech) – Information Technology University<br>College of Engineering, Kakatiya University, Kothagudem<br>CGPA: 7.2/10 | Oct 2020 – May 2024  |
| Intermediate (MPC)<br>Narayana Junior College, Hyderabad.<br>Percentage: 92.7 %                                                                | June 2018 – Apr 2020 |

## ACHIEVEMENTS

---

- Delivered React.js features and project modules on time while maintaining high code quality and meeting project requirements.
- Improved application performance by optimizing API calls, developing reusable React components, and implementing lazy loading techniques.
- Developed reusable and scalable UI components, making the application easier to maintain and enhancing the development process.
- Built responsive and mobile-friendly web applications that provided a consistent user experience across different devices.
- Integrated JWT authentication and RESTful APIs to enable secure user access and smooth communication between the frontend and backend.
- Worked closely with designers, backend developers, and QA teams in an Agile environment to deliver high-quality features and resolve issues efficiently.
- Received client appreciation for delivering quality work on time and contributing to the successful completion of project releases.

## CERTIFICATIONS

---

- Certified in React.js Development – Udemy
- Certified in Front-End Web Development (HTML, CSS, Bootstrap) – Great Learning.
- Completed REST API Integration and Web Development Certification – Great Learning.
